PRESCHOOL

Our Philosophy

CHILDREN

Children are unique individuals who enrich the lives of those around them. We respect that no child is the same and our role as educators is to identify and cater for the individual strengths, interests and needs of each child at our Preschool.

FAMILIES & COMMUNITY

Our Wise family brings a sense of community, providing a nurturing home away from home. We encourage and appreciate contributions from families and external community organisations to support our programs and services. Respecting all families' beliefs, cultures and diversity.

CURRICULUM

A core feature of our programs and practices is to prepare children for their future at school and beyond. Guiding children to identify themselves, their emotions, capabilities with our educators supporting them every step of the way.

ENVIRONMENTS

Our inspiring, nurturing, learning environments have been designed to allow children to participate and immerse themselves in play. We believe children learn best in an environment that promotes the foundations of play, exploration, creation and imagination.

OUR VISION

No matter what challenges children face in their future learning, we always want them to remember that they can be themselves and to foster a love of learning, like they have experienced at Wise Preschool.
